NGUYEN TIEN THUAN

Presales AI

Phone: 0365-5656-92 | Email: thuan.nguyen@softwareone.com | LinkedIn | GitHub

Summary

I am Bachelor of Information Technology and work in AI presales at SoftwareOne Vietnam. My experience spans enterprise AI solutions and full-stack development, alongside two AI research paper archivements and Microsoft certifications in Azure AI and agentic AI.

Work Experiences

1. Presales AI – SoftwareOne Vietnam May 2026 – Present

- **Project:** SoftwareOneHub
  - **Description:** An internal operations platform with integrated AI capabilities.
  - **Responsibilities:**
    - Develop and extend platform features to support internal business activities.
    - Organize platform modules into business-aligned groups and redesign the home navigation.
    - Integrate webinar and marketing workflows into the event module.
    - Integrate AI-generated marketing content from the AI platform through API contracts.
    - Integrate digital contract signing into the pricing workflow.
- **Project:** AI Central Platform
  - **Description:** An AI platform that helps organizations adopt AI solutions.
  - **Responsibilities:**
    - Build AI-powered features for the platform using Azure AI Foundry.
    - Contribute to the design of platform capabilities.
    - Build a standard AI workflow playbook for business analysis teams on the platform.
    - Build AI agents integrated into SoftwareOneHub for contract review, document generation, and marketing content creation (images, videos, and social posts).

2. Fullstack Developer – FPTU Laboratories January 2026 – April 2026

- **Description:** Developed a web portal for laboratories at FPT University, aimed at optimizing the management of research activities for FPT University faculty and students.
- **Responsibilities:**
  - Analyzed requirements and planned the development of the laboratories' web portal.
  - Designed the relational database in MySQL and containerized the infrastructure with Docker.
  - Built end-to-end features, from backend logic to user interfaces.

3. Salesforce Developer Intern – FPT Software January 2025 – April 2025

- **Description:** Participated in the requirements phase of a B2B Salesforce project while completing comprehensive training covering fundamental to advanced Salesforce development.
- **Skills acquired through training:**
  - Completed a Salesforce development training program to build a solid foundation in the platform's ecosystem.
  - Developed and customized user interfaces utilizing Lightning Web Components (LWC).
  - Implemented backend business logic and database queries using Apex and SOQL.

Certifications

- Microsoft Certified: Azure AI Cloud Developer Associate Link
- Microsoft Certified: Azure AI Apps and Agents Developer Associate Link
- Microsoft Certified: Agentic AI Business Solutions Architect Expert Link

Skills

- **Programming:** C#, Java, Python, C/C++, HTML, CSS, TypeScript.
- **Frameworks & Tools:** NextJS, Spring Framework, ASP.NET, Ms Agent Framework, PyTorch, Git, Docker.
- **AI:** Traditional AI, Computer Vision, Agentic AI.
- **Database & Cloud:** Azure, SQL Server, PostgreSQL.

Research Achievements

Acceptance AI Research Papers

- **Paper:** Feature-Level Diffusion Convolutional Networks for Image Anomaly Detection.
  - **Conference:** International Conference on AI in Systems Engineering (ICAISE'2026).
  - **Acceptance Date:** 24 March 2026.
  - **GitHub:** `https://github.com/TienThuan29/Diffusion-IAD`
  - **Description:**
    - Researched and developed a proof-of-concept AI solution for industrial image anomaly detection using feature-level diffusion model.
- **Paper:** Enhance an Efficient Contactless Palm Print Recognition System Tailored for University Environment.
  - **Conference:** 2025 7th International Symposium on Signal Processing Systems (SSPS 2025).
  - **Acceptance Date:** 24 January 2025.
  - **GitHub:** `https://github.com/VKev/Palm-Print-Identification-System`
  - **Description:**
    - This paper details a palm print recognition system designed for student identity verification, access control, and the prevention of unauthorized entry.
    - Developed and trained the core model using real-world data, alongside building a software application for model integration.

Education

FPT University – Bachelor of Information Technology (GPA: 3.4/4.0) September 2022 – April 2026

Achievements & Awards

1. Golden Toad Award April 2024

- Reveiced award for the most outstanding student of semester. GPA of semester: 3.9/4, FPT University HCM.

2. University Scholarship September 2022

- Received FPT University entrance scholarship for 4 years of undergraduate study.
