Summary

Information Technology graduate, with one year as a university Teaching Assistant for Python, C/C++, Data Structures & Algorithms, and Java OOP. Skilled at simplifying complex concepts and guiding learners one-on-one; passionate about sparking logical thinking and creativity in young learners. Drawing on practical work experience, I can help students explore AI tools and turn their ideas into creative, real-world projects.

Teaching Experience

Teaching Assistant – FPT University January 2025 – April 2026

Courses: Introduction to Programming Python, C/C++; Data Structures & Algorithms; Object-Oriented Programming with Java; Introduction to Computer Science.

- Led lab sessions: walked students through practice exercises, re-explained key concepts in simpler terms.
- Provided one-on-one support during Q&A hours, helping students who had fallen behind rebuild their foundations at their own pace.
- Graded assignments and tests, giving each student specific, constructive feedback on how to improve.
- Designed practice exercises, illustrative examples, and teaching materials to make abstract topics easier to understand.

Work Experience

AI Engineer – SoftwareOne Vietnam May 2026 – Present

- Build AI agents and chatbots for enterprise clients using Python.
- Develop full-stack web applications that integrate AI features.
- Prepare proofs of concept and demos, and present technical solutions to clients in clear, non-technical language.
- Run training sessions and workshops to help colleagues and clients get started with new AI technologies.

Tech Lead & Fullstack Developer – FPTU Laboratories January 2026 – April 2026

- Led the development of a web portal (NextJS, MySQL, Docker) for managing research projects, publications, and student recruitment.
- Planned the website development roadmap, breaking the project into clear tasks and milestones.
- Managed the weblab project end to end, tracking progress and delivering on schedule.
- Coordinated and communicated with team members to align goals, assign tasks, and resolve blockers.

Skills

- **Teaching:** Lab instruction & classroom support, explaining concepts to beginners, student Q&A, exercise & material preparation, grading with constructive feedback.
- **Programming:** Python, Java, C/C++, C#, HTML, CSS, TypeScript.
- **Frameworks & Tools:** NextJS, ReactJS, Spring Framework, ASP.NET, PyTorch, Git/GitHub, Docker.
- **AI:** Computer Vision, LLM, Agentic AI.
- **Database & Cloud:** MySQL, SQL Server, PostgreSQL, Azure.

Research Achievements

Computer vision research, resulting in two papers at international conferences:

- *Enhancing an Efficient Contactless Palm Print Recognition System Tailored for University Environment* – SSPS 2025, published by Springer Nature. Paper link
- *Feature-Level Diffusion Convolutional Networks for Image Anomaly Detection* – ICAISE 2026. Certificate link

Education

FPT University – Bachelor of Information Technology (GPA: 3.4/4.0) September 2022 – April 2026

Certifications & Awards

- **Microsoft Certified: Azure AI Cloud Developer Associate** Link
- **Microsoft Certified: Azure AI Apps and Agents Developer Associate** Link
- **Microsoft Certified: Agentic AI Business Solutions Architect Expert** Link
- **Golden Toad Award** – Most outstanding student of the semester April 2024
