NGUYEN TIEN THUAN

Junior AI Engineer

Phone: 0365-5656-92 | **Email:** nguyentienthuan9595@gmail.com | LinkedIn | GitHub

ABOUT ME

As a graduating Software Engineering student, my strengths lie in website development, and I can also research and apply AI to my work. I'm looking for a professional environment where I can develop and contribute my knowledge to the job.

SKILLS

- Programming: Java, C#, Typescript, Python, HTML, CSS, GitHub
- Database & Cloud: MySQL, SQL Server, PostgreSQL, AWS
- Framework: Spring Framework, ASP .NET, NextJS, PyTorch
- AI & Research: Computer Vision

EDUCATION

FPT University (FPTU)

Bachelor of Software Engineering *September 2022 - Present*

- Relevant Coursework: Introduction to Computer Science, C Programming, OOP with Java, Database Management, Algorithms and Data Structures, Software Requirements, Software Architecture.
- GPA: 3.4/4.0

EXPERIENCE

1. Student Researcher at University Laboratory *April 2024 - Present*

Acceptance AI Research Papers

- **Paper:** Enhance an Efficient Contactless Palm Print Recognition System Tailored for University Environment.
  - Conference: 2025 7th International Symposium on Signal Processing Systems (SSPS 2025).
  - Acceptance Date: 24 January 2025.
  - Github: https://github.com/VKev/Palm-Print-Identification-System
  - Description:
    - This paper details a palm print recognition system designed for student identity verification, access control, and the prevention of unauthorized entry.
    - Developed and trained the core model using real-world data, alongside building a software application for model integration.
    - Authors: Huynh Vuong Khang, Nguyen Tien Thuan and Dr. Huynh Cong Viet Ngu (Corresponding author)
  - Skills: PyTorch, Spring Framework, NextJS.
- **Paper:** Feature-Level Diffusion Convolutional Networks for Image Anomaly Detection.
  - Conference: International Conference on AI in Systems Engineering (ICAISE'2026).
  - Acceptance Date: 24 March 2026.
  - Github: https://github.com/TienThuan29/Diffusion-IAD
  - Description:
    - Researched and developed a proof-of-concept AI solution for industrial image anomaly detection using feature-level diffusion model.
    - Authors: Nguyen Tien Thuan and Dr. Huynh Cong Viet Ngu (Corresponding author)
  - Skills: PyTorch.

Fullstack Developer for Laboratories Website of FPTU Project *January 2026 - Present*

- Description: A comprehensive web portal designed to streamline the management of research projects, academic publications, and student recruitment for FPT University's laboratories.
- Responsibilities:
  - Analyzed requirements and planned the development of a comprehensive web platform.
  - Architected the relational database using MySQL and containerized the infrastructure with Docker. Engineered end-to-end features, from backend logic to user interfaces.
- Skills: NextJS, MySQL

2. FPT Software Company Internship

Salesforce Developer Intern *January 2025 - April 2025*

- Description: Participated in the requirements phase of a B2B Salesforce project while completing comprehensive training covering fundamental to advanced Salesforce development.
- Skills acquired through training:
    - Completed a Salesforce development training program to build a solid foundation in the platform's ecosystem.
    - Developed and customized user interfaces utilizing Lightning Web Components (LWC).
    - Implemented backend business logic and database queries using Apex and SOQL.

CERTIFICATES

1. Develop AI solutions in Azure *April 2026 - May 2026*

- Completed Course AI-102T00-A: Develop AI solutions in Azure
    - Develop generative AI apps in Azure
    - Develop AI agents on Azure
    - Develop natural language solutions in Azure
    - Develop computer vision solutions in Azure
    - Develop AI information extraction solutions in Azure

2. Introduction to Microsoft 365 and AI administration *April 2026 - May 2026*

- Completed Course AB-900T00-A: Introduction to Microsoft 365 and AI administration
    - Explore Microsoft 365 administration
    - Explore Microsoft 365 Copilot and agent administration

PROJECTS

1. Ticket Resell Platform *August 2024 - December 2024*

- Description: The system acts as a third party to connect buyers and ticket sellers, ensuring safe and transparent transactions.
- Responsibilities:
    - Analyze context, requirements of platform.
    - Design database, architecture for platform.
    - Develop frontend, backend for project.
- Skills: Spring Framework, ReactJS, SQL Server
- Github:
    - Frontend: https://github.com/Arexmarx/ResellTicket_PlatformUi
    - Backend: https://github.com/TienThuan29/ticket-resell-platform-backend-v2

2. Jungle Run Game *March 2023 - April 2023*

- Description: The project is a 2D obstacle course game, made by C language and SDL library.
- Responsibilities:
    - Develop the logic game, collision detection, game state transitions, and input handling.
- Skills: C, SDL library
- Github: https://github.com/TienThuan29/JungleRunGame

ACHIEVEMENTS & AWARDS

1. Golden Toad Award *April 2024*

Description: Reveiced award for the most outstanding student of semester.

GPA of semester: 3.9/4 FPT University, Ho Chi Minh City.

2. University Scholarship *September 2022*

Description: Received FPT University entrance scholarship for 4 years of undergraduate study.
